Introduction to Your Humidor

About Cigars/Terminology

- Band – Ring of paper wrapped around the closed head of most cigars
- Binder – Portion of a tobacco leaf that holds the filler leaves, the bunch, together
- Blend – The mixture of different types of tobacco in a cigar, including up to five types of filler leaves, a binder leaf and an outer wrapper
- Bloom – Harmless white film caused by tobacco oils rising to the surface of the cigar wrapper. Often indicates a strong taste. (Also called Plume)

- Bouquet – Used to describe the smell of a fine cigar and, of course, fine wines
- Bunch – Filler tobacco used to create the body of a cigar
- Cap – A circular piece of wrapper leaf used to secure the wrapper at the cigar head
- Cigarillos – Thin, three-inch cigars, generally machine-made
- Draw – Amount of air that gets pulled through a lit cigar. Easy/hot or tight/plugged
- Flag – Instead of a cap, flags are an extension of the wrapper leaf used to finish the head of a cigar. Sometimes tied off in a pigtail or a curly head
- Foot – The end of the cigar that you light. Often pre-cut
- Head – The closed end of the cigar that you put into your mouth
- Hot – A cigar draw that is too easy, often because it has been under-filled
- Hygrometer – Device used to measure humidity or percentage of moisture in the air
- Long Filler – Whole tobacco leaves used to fill a cigar; these leaves are long and can run the length of the cigar's bunch. Long filler should burn evenly and consistently
- Piercer – Used to cut/pierce a small hole in the end of a cigar (also called a 'lance')
- Plug – A blockage that prevents a cigar from drawing properly. (Gently massaging the cigar may relieve a plugged draw)

- Ring Gauge - Diameter of a cigar's barrel, expressed in 64ths of an inch. A half-inch cigar would be a 32 ring (32/64)
- Short Filler – Cigar bunch comprised of scraps of tobacco (parts of leaves and twigs)
- Shoulder – Where the cap of the cigar meets the barrel. The cigar will unravel if cut
- Tunneling – Uneven burning of a cigar which occurs when a wrapper does not ash
- Wrapper – High-quality tobacco leaf wound around the finished bunch and binder

Instruction on Installation

Before using this product, please:

- Remove all external and internal packaging.
- Verify that the accessories are present: Cigar Drawer, Instruction Manual.
- Place the product on a flat and stable surface. Screw or unscrew the adjustable feet for leveling.
- Before connecting this product to the power source, place in the desired location and wait for 2 hours to avoid risk of cooling system malfunction.
- Clean the inside of the unit with a soft cloth (do not use detergent or solvent).

- Verify that the power cable is not damaged. If cord is damaged, have it replaced by an authorized technician.
- It is recommended to install this unit in a room where the ambient temperature is not lower than 10°C or higher than 26°C. If the ambient temperature is not in this range, the inside temperature may not maintain ideally for your cigars. The inside temperature of the product also can vary if the inside indicator light is turned on or off.

Use

- Connect the unit to the power supply.
- Set the temperature to 18°C.
- Place cigars loose in the top drawer or place your box in the lower section.
- To turn on/off the inside light, press the light button.

Cleaning

- Disconnect the power cord.
- Clean the inside of cigar humidor with warm water and mild soap. Do not use abrasive detergent or solvents. Do not use moisture on the wood shelves as it can stain. Use mild window cleaner for the glass door, but do not use this cleaner for the door trim.
- Don't put the shelf in the dishwasher.

Technical Data

Model Number	CHC12
Capacity	33 L
Tension	220V
Current	0.5A (25°C)
Protection Class	I
Frequency	50Hz
Climatic class	SN, N
Input power	70W
Electric consumption	0.5KW·h/24h (15°C)
Temperature range	10-18°C
Net weight	12.0 kg
Gross weight	14.5 kg
Dimension	34.0 x 46.8 x 51.0cm
Package dimension	43.0 x 55.5c x 60.0m
